

opportunities

TTP is Europe's leading technology development and engineering company. Based near Cambridge, England, we have about 300 staff developing technologies, products and manufacturing processes in fields that range from wireless communications and digital printing through to medical devices and life science instrumentation. Our customers are leading businesses throughout the USA, Europe and the Far East.

TTP is looking for clever, hardworking, innovative and hands-on scientists and engineers with a high degree of commercial awareness to contribute to the continued growth and success of our business. Our success depends on flexible and committed staff prepared to ensure we meet our customers' targets – development timescales are short, the specifications demanding, and the projects often require frequent international travel.

Hardware Design Engineer (ref.www-CW2)

Communications & Wireless Group

The Communications & Wireless Group is a multidisciplinary group of engineers developing leading edge communications technologies and products. We undertake a diverse range of exciting and challenging programs for international blue-chip companies.

The Qualifications:

- Hardware Design Engineer with a 1st or a 2.1 degree in Engineering
- In-depth experience in product development, preferably in communications systems
- Embedded hardware development of systems using a range of microcontrollers, including ARM based processors
- Switch mode power supply design for battery operated systems
- Experienced in low power design
- Analogue electronics design expertise

The Role:

- A good working knowledge of radio design, from low frequencies up to 2.5GHz
- A team player who can quickly adapt to a diverse range of projects
- Effective design for cost critical high volume manufacture as well as specialist systems where cost is not critical
- Experience in taking products into full manufacture
- Systems level thinker who can create a detailed product specification from a basic market concept

The Rewards

- Competitive salary and benefits.
- Professional development into a variety of technical, business and leadership roles.
- Participating in a fast moving, world class business, with the opportunity to make a visible contribution to the success and growth of the business.
